# Online Job App

## Online Job Portal

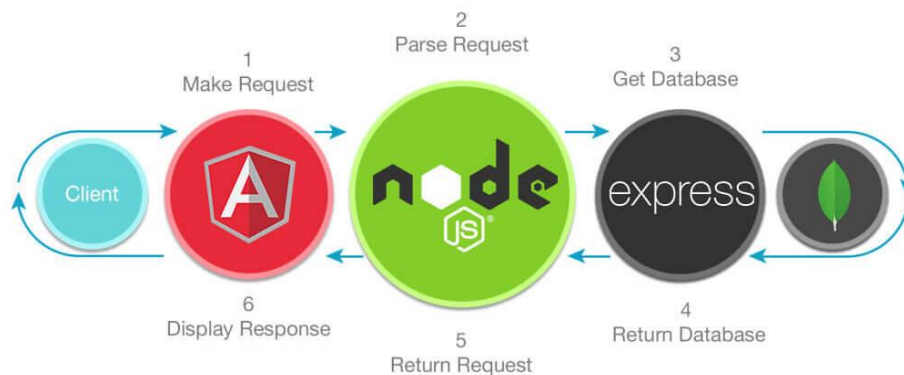

Jobseeker search for jobs and employers find qualified employees. While employers still advertise job openings through traditional advertising mediums, such as local newspapers and magazines, today employers and job seekers turn to online job portals to find employment matches. Job seekers can advertise their skills and search for available positions, and employers can announce employment openings through job portals.

Job portals allow job seekers to sign up for a free account, which allows them to search job openings posted by employers and post their resumes for employers to review. Job seekers can browse through job openings posted by employers and apply for positions through the job portal.

### Software Required:

- Visual Studio Code
- Node JS
- MongoDB
- Browsers : IE, Firefox & Chrome

**Develop the application using MERN Stack** : HTML5, CSS3, Bootstrap, Angular, Node JS, ExpressJS & Mongo DB.
